

Index to Volume 180

- Abdel-aleem S, El Awadi MK, Zarouk WA, Taylor D, Lowe JE: Effects of phosphodiesterase inhibitors on glucose utilization in isolated cardiac myocytes 129–135
- Abdel-aleem S, St. Louis J, Hendrickson SC, El-Shewy HM, El-Dawy K, Taylor DA, Lowe JE: Regulation of carbohydrate and fatty acid utilization by L-carnitine during cardiac development and hypoxia 95–103
- Abd-Elfattah ASA, Hoehner J, Wechsler AS: Identification of nucleoside transport binding sites in the human myocardium 105–110
- Abd-Elfattah ASA, Jessen ME, Lekven J, Wechsler AS: Differential cardioprotection with selective inhibitors of adenosine metabolism and transport: Role of purine release in ischemic and reperfusion injury 179–191
- Abd-Elfattah ASA, Maddox RP, Jessen ME, Rebeyka IM, Wechsler AS: Role of nucleoside transport and purine release in a rabbit model of myocardial stunning 145–151
- Abd-Elfattah ASA, *see* Mahgoub MA
- Altschuld RA, *see* Starling RC *et al.*
- Bora PS, Miller DD, Chaitman BR: Mutagenesis and characterization of specific residues in fatty acid ethyl ester synthase: A gene for alcohol-induced cardiomyopathy 111–115
- Buja LM, *see* Wang D *et al.*
- Cam MC, *see* Rodrigues B *et al.*
- Chaitman BR, *see* Bora PS *et al.*
- Christian B, Zainab EAT, Mireille M, Josef M: Palmitate oxidation by the mitochondria from volume-overloaded rat hearts 117–128
- Cook GA, *see* Park EA
- De Windt LJ, Reneman RS, Van der Vusse GJ, Van Bilsen M: Phospholipase A₂-mediated hydrolysis of cardiac phospholipids: The use of molecular and transgenic techniques 65–73
- Doenst T, Guthrie PH, Taegtmeyer H: Ischemic preconditioning in rat heart: No correlation between glycogen content and return of function 153–161
- Dyck JRB, Lopaschuk GD: Glucose metabolism, H⁺ production and Na⁺/H⁺-exchanger mRNA levels in ischemic hearts from diabetic rats 85–93
- El Awadi MK, *see* Abdel-aleem S *et al.*
- El-Dawy K, *see* Abdel-aleem S *et al.*
- El-Shewy HM, *see* Abdel-aleem S *et al.*
- Glatz JFC, *see* Schaap FG *et al.*
- Guthrie PH, *see* Doenst T *et al.*
- Hacker TA, Renstrom B, Nellis SH, Liedtke AJ: The role of glucose metabolism in a pig heart model of short-term hibernation 75–83
- Hammer DF, *see* Starling RC *et al.*
- Hendrickson SC, *see* Abdel-aleem S *et al.*
- Hoehner J, *see* Abd-Elfattah ASA *et al.*
- Jayakumar J, *see* Smolenski RT *et al.*
- Jessen ME, *see* Abd-Elfattah ASA *et al.*
- Josef M, *see* Christian B *et al.*
- Kalsi KK, Smolenski RT, Yacoub MH: Effects of nucleoside transport inhibitors and adenine/ribose supply on ATP concentration and adenosine production in cardiac myocytes 193–199

King LM, Opie LH: Glucose and glycogen utilisation in myocardial ischemia – Changes in metabolism and consequences for the myocyte	3–26
Lekven J, <i>see</i> Abd-Elfattah ASA <i>et al.</i>	
Liedtke AJ, <i>see</i> Hacker TA <i>et al.</i>	
Lopaschuk GD, <i>see</i> Dyck JRB	
Lowe JE, <i>see</i> Abdel-aleem S <i>et al.</i>	
 Maddox RP, <i>see</i> Abd-Elfattah ASA <i>et al.</i>	
Mahgoub MA, Abd-Elfattah ASA: Diabetes mellitus and cardiac function	59–64
McMillin JB, <i>see</i> Wang D <i>et al.</i>	
McNeill JH, <i>see</i> Rodrigues B <i>et al.</i>	
Miller DD, <i>see</i> Bora PS <i>et al.</i>	
Mireille M, <i>see</i> Christian B <i>et al.</i>	
 Nellis SH, <i>see</i> Hacker TA <i>et al.</i>	
Opie LH, <i>see</i> King LM	
 Park EA, Cook GA: Differential regulation in the heart of mitochondrial carnitine palmitoyltransferase-I muscle and liver isoforms	27–32
Paulson DJ: Carnitine deficiency-induced cardiomyopathy	33–41
 Rebeyka IM, <i>see</i> Abd-Elfattah ASA <i>et al.</i>	
Reneman RS, <i>see</i> De Windt LJ <i>et al.</i>	
Renstrom B, <i>see</i> Hacker TA <i>et al.</i>	
Rodrigues B, Cam MC, McNeill JH: Metabolic disturbances in diabetic cardiomyopathy	53–57
 Schaap FG, Van der Vusse GJ, Glatz JFC: Fatty acid-binding proteins in the heart	43–51
Seymour AML, <i>see</i> Smolenski RT <i>et al.</i>	
Smolenski RT, Jayakumar J, Seymour AML, Yacoub MH: Energy metabolism and mechanical recovery after cardioplegia in moderately hypertrophied rats	137–143
Smolenski RT, <i>see</i> Kalsi KK <i>et al.</i>	
Starling RC, Hammer DF, Altschuld RA: Human myocardial ATP content and <i>in vivo</i> contractile function	171–177
St. Louis J, <i>see</i> Abdel-aleem S <i>et al.</i>	
 Taegtmeyer H, <i>see</i> Doenst T <i>et al.</i>	
Taylor DA, <i>see</i> Abdel-aleem S <i>et al.</i>	
 Van Bilsen M, <i>see</i> De Windt LJ <i>et al.</i>	
Van der Vusse GJ, <i>see</i> De Windt <i>et al.</i>	
Van der Vusse GJ, <i>see</i> Schaap FG <i>et al.</i>	
 Wang D, Xia Y, Buja LM, McMillin JB: The liver isoform of carnitine palmitoyltransferase I is activated in neonatal rat cardiac myocytes by hypoxia	163–170
Wechsler AS, <i>see</i> Abd-Elfattah ASA <i>et al.</i>	
 Xia Y, <i>see</i> Wang D <i>et al.</i>	
Yacoub MH, <i>see</i> Kalsi KK <i>et al.</i>	
Yacoub MH, <i>see</i> Smolenski RT <i>et al.</i>	
 Zainab EAT, <i>see</i> Christian B <i>et al.</i>	
Zarouk WA, <i>see</i> Abdel-aleem S <i>et al.</i>
